

STRONGER STARTS & INCREASED CALF VIGOR

HERB BURGUS

Blueprint®

HERB BURGUS

"We currently use Blueprint® Calving Mineral with Bio-Mos® and Blueprint Fescue Mineral with Altosid® IGR on our operation. We started using the calving mineral to combat scours in first and second season calves and scours just seemed to disappear. Despite some wet springs, calves have experienced stronger starts and have a lot more vigor. We then decided to give the fescue mineral a try. Even in the heat of the day, cows will be out eating and our tail loss has really improved. We were also having trouble with wind blowing away our previous mineral because it was too fine, but we don't experience this issue with Blueprint because it is more coarse and consistent."
