Nutritionally Challenged	1100	any age		•			•			8 - Cool Command 1 - 30% Supp	12 20

<sup>1</sup> Weights will vary depending on breed and body condition of animal.

<sup>2</sup> Amount of feed required will vary depending on age, level of activity, desired growth and quality of forage available and general condition of the horse.

<sup>3</sup> Pasture equivalent means similar dry matter intake of hay.

\* This is only a guide. The non-senior feeds are designed to be fed at 0.5-1.0% of body weight.

*This is only a guide. The non-senior feeds are designed to be fed at 0.5 - 1.0% of body weight.*
